Recommender System for Books using NLP

https://github.com/jonathanhild/powellsbooks

> (In Process) The recommender algorithm uses NLP techniques to give recommendations based on Powell's Books' Staff Picks. This project includes a web scraping tool, SQLite database, and Streamlit web interface built in Python. This is an independent project not affiliated with Powell's Books.

GeoGuessr Maps

https://github.com/jonathanhild/geoguessrmaps

> Creating latitude/longitude coordinates sets made with Python and Google Maps API for Map Maker in GeoGuessr.com.

♥ Skills

Data Cleaning & ETL) [Machine Learning] [Web Scraping] [Database Design] [Regex] **Data Science & Analysis** [JIRA & Project Management] [Technical Writing & Communication] [Accounting] **Python** Pandas (Numpy) (SKLearn) (Matplotlib) (Seaborn) (SQLAlchemy) (Beautiful Soup) **Tools** SQL (Anaconda) (PostgreSQL) (SQL Server) (SQLite) (SSMS) (Git & GitHub) (Excel) **Information Technology** Database Admin) (Ubuntu Linux 16.04+) (Windows Server Admin) (Dynamics NAV)

IT Specialist / Supplier Quality Specialist / Tech. Documents Coord.

Aug 2012 — Jan 2020

Oregon Spice Company

Portland, OR

- > ETL project to migrate 10+ years of company data to new ERP system. Extensive use of Python scripting with regex for cleaning and load into Dynamics NAV.
- > Created linear regression model to dynamically select packaging components based on material densities. Used Python scripting to produce new item SKUs.
- > Created reporting and analytics for multiple business units with Excel and SSRS.
- > Managed all IT operations. Database and server administrator for Dynamics NAV environment. Implemented backup and performance tuning workflows.
- > Built supplier grading/monitoring program in Tracegains SaaS with custom SQL scripting. Created supplier performance KPIs for organization.
- > Built Access program to create, manage, and version specifications. Connect to Syspro ERP using SQL and ODBC connectors. Built Access program to rapidly compute product traceability.
- > Technical point of contact to customers on food safety and quality documentation.
